

## Supporting the Needs of All Students

All middle schools offer a diverse range of engaging courses and programs that will prepare students for the challenges of the 21<sup>st</sup> Century, college, and the workplace. All students with the ability, motivation, or potential to perform at high levels are encouraged to enroll in advanced-level courses offered at every Montgomery County Public School (MCPS) middle school (MS), with some courses allowing students to earn high school credit while in middle school. Students who participate in such challenging coursework deepen and enrich their understanding of content and collaborate with peers on rigorous tasks.
