Camps, care, and enrichment programs designed to educate, entertain, and engage students.

## CLASS DESCRIPTION

### SCIENCE THROUGH ART ISTEAM

Our young scientists will get to create art, experiment with creativity and outside of the box thinking while learning about science. Scientific concepts are introduced through hands-on projects like modeling the water cycle with colorful rainclouds, reactions with starch and acid making invisible ink, and exploring ocean density. Our young scientists are encouraged to ask questions, think critically, experiment, and explain their reasoning and problem-solving. As a result, they will deepen their collaboration, creativity, and critical thinking skills, as well as their understanding and interest in science.

### CHESS CLUB SILVER KNIGHTS CHESS

Learn chess with Silver Knights! We've taught 100,000 children to play including state & national champions, but most students are beginners looking to learn a new skill and have FUN. Class time is divided between lessons and practice games. Lessons range from the basic rules to advanced tournament strategies. Students will have the opportunity to play in tournaments. All chess supplies provided. All skill levels are welcome.

### POTTERY FOR KIDS - SPRING MUDSKIPPERS

Join Mudskippers Pottery and fling into Spring! Come get your hands dirty as we explore the world of pottery with stoneware clay, fired bisqueware and modeling clay. Each session our students explore new projects and artworks. Come on and see how much fun it is to get muddy!
